PROFILE

As an experienced Android developer with over 3 years of expertise in mobile application development, I possess a strong ability to develop Android applications that meet user requirements with exceptional functionality and user experience. I am highly adaptable and thrive in dynamic and challenging work environments where I can utilize my existing skills and knowledge while also developing new skills that contribute to the growth and success of the organization.

WORK EXPERIENCE

Software Engineer

IndiaNIC Infotech Limited

July 2021 - till Date

- Work on building high-performance applications with all the latest Jetpack components. Also, bug fixing and improving application performance.
- Continuous learning and evolving to learn new technologies: Flutter for now
- As an Android Project Lead, I'm currently building an enterprise-level native Android application for the biggest grocery chain eCommerce platform in the US - **Grocery Outlet Loyalty App**. Starting from scratch, my team and I are dedicated to creating a user-friendly, reliable, and highly functional app that offers a wide range of groceries to customers. Published on Play Store.
- I have worked on the **YOU app**, which is the largest multi-vertical eCommerce platform in the Kingdom of Bahrain. The app offers a diverse range of verticals including food, fashion, grocery, electronics, health, and beauty. In Play Store

Android Developer

PHP Poets Private Limited

June 2019 - July 2021

- Design and build advanced applications for the Android platform.
- I have contributed to developing the **Yolmate Mechanic App**, specifically the Yolmate Partner App. I was responsible for creating different layouts and integrating them into the app under the guidance of senior developers. The app is now available on the Play Store.
- I played a crucial role in developing the **Healthy Master** eCommerce app published on the Play Store. My responsibilities included creating a test app to understand the app's functionality, integrating APIs using the Retrofit REST client, implementing login and sign-up functionality, and adding cart and wishlist features with push notifications using Firebase. The app is now available for download on the Play Store.
- Worked and maintained, the **Alok School App** and **Indian Institute of Crafts and Design App**
- Worked on design and layout creation for **Jaipur Smart City Project: Parking Website Design**
