# Jamine Patel

### ANDROID DEVELOPER

## **OBJECTIVE**

To obtain a career in Software Development and to gain experience and growth in me which will help in the advancement of the Organization.

## ROFILE

I'm an Android Developer, graduated from Rajasthan Technical University who loves creating android apps and playing video games.

- Design and build advanced applications for the Android platform.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

## WORK EXPERIENCE

#### PHP Poets IT Solution, Udaipur

June, 2019 •---- Present

- Work on bug fixing and improving application performance.
- Continuous learning and evolving to learn new technologies: Flutter and Kotlin for now
- Yolmate Mechanic App:- There are two apps, one is the customer app and the other is the mechanic app, I have worked for the latter, This is the individual project given by the company and was completed on given time. App in Play Store

IICD:- Indian Institute of Crafts and Design. In the

- app, I used Jsoup for webviews. Added features and UI Enhancements in the app. Integrated many APIs. The app was fully written in Kotlin. App in Play Store.
- Worked on an eCommerce app, Healthy Master.
   Created the test app to understand the working of the app, Calling all the APIs with the use of Retrofit REST Client, Log in and Sign-Up, Cart and Wish list Functionalities with Push Notifications in Android using Firebase. App in Play Store
- Worked and maintained, Alok School App which is School Management App with support of multilogin with crashlytics management from firebase. App in Play Store

- +91-7739764015
- jaypatelbond7@gmail.com
- Jaypatelbond.github.io
- 9 155, Kadamkuan Patna, Bihar
- WaytoPay app:- This is a recharge app and I have worked on the project individually with creating the. screens and front-end part with help of Zeplin and Integrating the APIs in the app through Retrofit. The App also features like AEPS payment method so I Integrated AEPS SDK from eko.in Fast-tag and more. The App has nearly 70+ APIs which I have Integrated.
- Shopperz app:- Worked on the app which is a B2B Platform, worked individually app and created almost 75+ screens for both apps and integrated all the necessary APIs. Currently working on this project.

## OTHER SIDE PROJECTS

- 4Med app:- Online Medical Store with all basic features like Order and Buy medicines with Cashfree Payment Gateway. Worked with a Backend team App in Play Store
- E-Septic Services:- Worked on 2 apps together for a septic solution with help of backend team. Created tracking of Lat long with Work Manager and posting it every 15 min for getting estimate of every trip. Customer can book the service and partner can confirm the booking with alerts via notifications.
